PROFESSIONAL SUMMARY

Second-year Aerospace Engineering and Mathematics student at UNSW (WAM 88.7, ATAR 99.65) with hands-on experience in SolidWorks FEA, fabrication, aerodynamic testing, embedded systems, and Python numerical simulation of flight mechanics and orbital dynamics. Consistently pairs analytical models with physical validation, such as wind-tunnel-tested aerodynamic prototypes and numerical orbital solvers.

EDUCATION

UNSW Sydney

Bachelor of Advanced Science (Hons) / Bachelor of Engineering (Hons)

Kensington, Sydney

2025 – Present

- **Majors:** Aerospace Engineering & Mathematics
- **Current WAM:** 88.727 (High Distinction Average)
- **Academic Record:** Engineering Mathematics 2E (96), Computing 1A - C Programming (92), Discrete Mathematics (92), Numerical Methods & Statistics (93), Engineering Mechanics (90), Fluid Mechanics for Engineers (89).

Normanhurst Boys High School

Higher School Certificate (HSC) | ATAR: 99.65

Normanhurst, Sydney

2019 – 2024

ENGINEERING PROJECTS

Orbital Trajectory & Telemetry Suite

Solo Developer

Personal Project

May 2026 – Jun 2026

- **IVP Trajectory Simulator:** Numerically integrated a **5-state ODE system** (position, velocity, mass) in polar coordinates using `scipy.integrate.solve_ivp` (RK45), modelling gravity-turn ascent with **dynamic atmospheric drag** interpolated from a real altitude-density dataset across **1000 km** of scale height.
- **BVP Orbital Insertion Solver:** Formulated a **3-DOF boundary value problem** to solve for circular orbit insertion parameters across a **3-phase mission** (ascent burn, coast, apogee kick), solved using `scipy.optimize.least_squares` with dynamic variable scaling.

Go-Kart Engineering & Fabrication

Designer & Fabricator

Personal Project

May 2025 – May 2026

- **Design & Simulation:** Engineered the primary chassis and battery holding beams using SolidWorks static FEA, validating an inflated 150kg occupant load and a 100kg battery allowance (Load Factor > 2). Confirmed a **Factor of Safety > 2** (peak stress of 120 MPa against a 250 MPa yield strength) and restricted maximum deflection to 0.9cm, preserving a safe 20cm operational ground clearance.
- **Manufacturing & Assembly:** Executed chassis and sheet metal enclosure fabrication using **Gasless MIG Welding**, and soft soldering for the integration and wiring of six 12V 22Ah COTS batteries.
- **Testing & Optimisation:** Conducted physical testing and powertrain optimisation, diagnosing a drivetrain chain-slip fault via slow-motion video analysis achieving an acceleration of **4.5 m/s²**.

Morphing Wing Aerodynamic Prototype

Co-Designer / Systems Integration

UNSW Sydney

Feb 2025 – May 2025

- **Design:** Designed and 3D-printed a scale morphing wing prototype using SolidWorks, integrating Arduino Uno-controlled servo motors to dynamically alter airfoil geometry achieving a maximum **wing angular displacement of 43 degrees**. Iteratively refined through laser-cut acrylic failure analysis before finalising a PLA compliant chevron mechanism.
- **Aerodynamic Testing:** Conducted empirical wind-tunnel testing to validate performance metrics, achieving **~13% increase in the L/D** from 5.00 to 5.68.
- **Control:** Developed an **open-loop direct-mapping** control system to actuate servo motors via potentiometer input, enabling real-time wing profile adaptation.

OTHER EXPERIENCE

Project Academy

HSC Mathematics Tutor

Sydney

Dec 2024 – Present

- Lead groups, maintain classroom control, and break down complex mathematical concepts for senior students.

TECHNICAL SKILLS

Engineering Software & Programming

- **CAD & FEA:** SolidWorks (Proficient in static FEA, complex assemblies, and 3D component modelling)
- **Numerical Analysis:** Python (Linear systems, root-finding algorithms, IVPs, BVPs, and data visualisation)
- **Embedded Systems:** C/C++ (Arduino control logic, mechatronic actuation, and hardware-software integration)

Hardware & Fabrication

- Gasless MIG Welding, Soft Soldering, Surface Mount (SMD) Soldering.

COMMUNITY & FITNESS

- Ultimate Frisbee & Badminton Team Captain (2022–2024); Push-Up Challenge and World's Greatest Shave participant.
